

Concrete Pipe

Reinforced concrete pipe is the first choice for any fill and live load condition, and is essential when failure might endanger life or property.

Over one hundred years of experience in North America proves the value of reinforced concrete pipe as a keystone to our buried infrastructure

Forterra circular pipe are manufactured to OPSS & CSA specifications. Our concrete circular pipe are certified by the Plant Prequalification Program.

Benefits of Precast Concrete Pipe

- Consistent product that is that goes through rigorous quality control testing
- Ease of installation
- Sustainable product that provides longer design life than other products
- The pipe is the structure & the conduit

**EASY TO
INSTALL**

**SUSTAINABLE
PRODUCT**

**MADE TO
OPSD**

CIRCULAR PIPE DIMENSIONS

Diameter (mm)	Length of Pipe (m)	Waterway Area (m ²)	Approximate Mass (kg/m)
300	2.29	0.07	219
375	2.29	0.11	296
450	2.29	0.16	292
525	2.29	0.22	461
600	2.29	0.29	549
675	2.29	0.37	675
750	1.29	0.45	757
825	2.29/2.44	0.55	856
900	2.29	0.65	1,001
975	2.29/2.44	0.77	1,144
1050	2.44	0.89	1,283

CIRCULAR PIPE DIMENSIONS

Diameter (mm)	Length of Pipe (m)	Waterway Area (m ²)	Approximate Mass (kg/m)
1200	2.44	1.17	1,340
1350	2.44	1.48	1,933
1500	2.44	1.82	1,927
1650	2.44	2.21	2,449
1800	2.44	2.63	2,695
1950	2.44	3.06	3,125
2100	2.44	3.57	3,585
2250	2.44	4.10	4,326
2400	2.44	4.67	4,596
2550	2.44	5.27	5,179
2700	2.44	5.91	5,752
3000	2.44	7.3	7,541
